

```
1  function getBooksByAuthor(author, callback) {
2      // Assuming you already have the bookList (e.g., fetched from a database)
3      getBookList((bookList) => {
4          const booksByAuthor = bookList.filter((book) => book.author === author);
5          callback(booksByAuthor);
6      });
7  }
8
9  // Usage
10 const targetAuthor = "Author 1";
11 getBooksByAuthor(targetAuthor, (books) => {
12     console.log(`Books by ${targetAuthor}:`);
13     console.log(books);
14 });
```
