

```
1 // Assuming you have a function to delete a book review from the database
2 function deleteBookReview(ISBN, callback) {
3   // Implement the database interaction to delete a review based on your backend setup
4   // For this example, we'll simulate deleting a review
5   setTimeout(() => {
6     // Delete the review from the database here
7     console.log("Review deleted successfully!");
8     callback();
9   }, 1000); // Simulating a 1-second delay for database interaction
10 }
11
12 // Usage
13 const ISBNToDeleteReview = "123456789";
14
15 deleteBookReview(ISBNToDeleteReview, () => {
16   console.log("Review deleted.");
17 });
```
