

```

// Assuming you have a function to fetch the book list from the shop's database
function getBookList(callback) {
  // Simulating an asynchronous API call
  setTimeout(() => {
    const bookList = [
      { ISBN: "123456789", title: "Book 1", author: "Author 1" },
      { ISBN: "987654321", title: "Book 2", author: "Author 2" },
      { ISBN: "456789123", title: "Book 3", author: "Author 1" },
      // Add more books as needed
    ];

    callback(bookList);
  }, 1000); // Simulating a 1-second delay for fetching data
}

// Usage
getBookList((bookList) => {
  console.log("Available Books:");
  console.log(bookList);
});

```
